

Privileged Access Review Record

Document reference	SEC-AC-07 Rev.3
Organization	Northstar Digital Services (synthetic demo)
Review period	Fourth quarter 2025
Document type	Synthetic audit evidence

Review Evidence

The documented procedure requires privileged-access reviews to be completed every quarter.

Records for the first three quarters were available during the audit. The fourth-quarter privileged-access review was completed two weeks after the required date. The related management approval record was not available during the audit.

The audit scope was limited to privileged user accounts. The audit did not examine other access-control processes.

Synthetic, de-identified classroom test data only. This document is not an actual audit record or certification decision.
