

ISMS Objectives Register Review

Document reference	OBJ-REG-01
Organization	Acme Corp (synthetic major NC demo)
Review date	18 September 2026
Document type	Synthetic audit evidence

Review Evidence

No information-security objectives had been established for any business function.

No objective owners, measures, target dates, or monitoring records were available across the organization.

The previous internal audit recorded the same absence. No corrective action had been implemented, indicating a management-system-wide failure of the information-security objectives process.

Synthetic, de-identified classroom test data only. This document is not an actual audit record or certification decision.
